...take advantage of

THERMLfilm® Advantage

**EXTREME
SUPERB
VALUE**

Take advantage of

FLEXcon's THERMLfilm® Advantage range is a successful proven extension to the existing THERMLfilm product range.

THERMLfilm® ADVANTAGE

POLYESTER for DURABILITY

the THERMLfilm® Advantage range consists of a range of 50µ durable polyesters suitable for the most challenging of applications. **Choose from; white, satin white, satin silver, satin clear and clear ***

CHEMICALLY RESISTANCE MULTI - PRINTABLE TOPCOAT

all of the THERMLfilm® Advantage products are coated with the same top coat** offering **increased chemical resistance**. The products are unique in that they are suitable for multipass UV printing which can then be thermal transfer printed thereafter with a variety of combo and/or resin ribbons.

CHOICE of HIGH PERFORMANCE ADHESIVES

every product comes with a choice of 3 high performance acrylic adhesives, each offering different performance levels. Our good (**VALUE**), better (**SUPERB**) and best (**EXTREME**) approach gives you the flexibility to choose the right adhesive for the right application.

The **extreme**, high performance acrylic adhesive offers a new dimension in performance on low surface energy on rough substrates.

* clear is available in both 50micron and 25micron for overlaminating applications

** except satin white

To mix and match our components to meet your needs think about our **TRIAL ROLL PROGRAMME**

FLEXCON Capabilities

Smaller order quantities for trials
Tailor make your own solutions

Fast turnaround for initial production trial rolls
Delivery of 50m of your favourite THERMLfilm
order quantity in under 48 hours

Our most popular adhesives are
now available in combination with our polyester
backsheet giving you the choice of using your
preferred production quality material in your
application rolls.

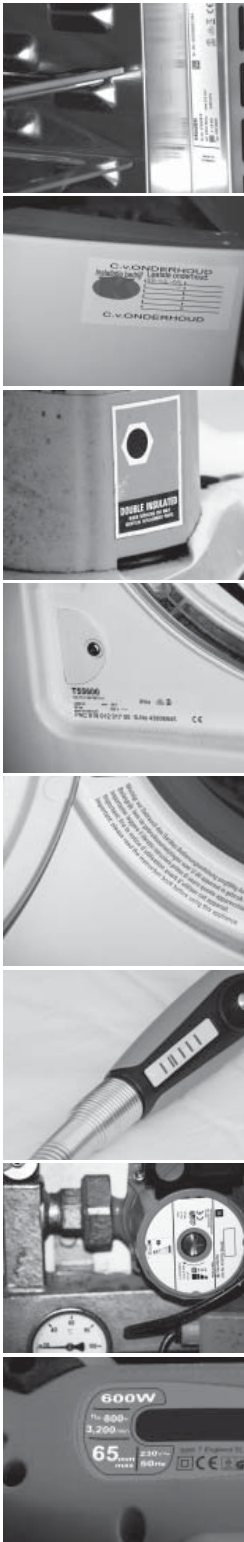

New Trial Roll Programme

Our standard flexibility offers you the possibility
of mixing your own customised materials whilst
keeping to your own quantities.

This roll is available on a standard roll, unless
specified in your order form or 50m roll
(where applicable).

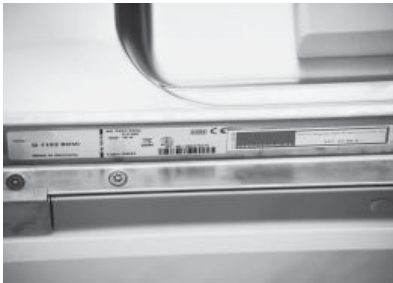

Other films and sizes are available upon request.

Minimum length 50m up to 500m
Delivered within 3 weeks

Goods and more...

offers excellent anchorage with a variety of conventional inks and has high chemical resistance. The range can be thermal transfer printed with combo & resin ribbons at low burn settings. All products are suitable for fan-fold applications.

THERMLfilm® Advantage
VALUE

General high performance modified acrylic adhesive with high shear, peel and tack values. Excellent adhesion on high surface energy plastics and stainless steel.

Typical use for industrial labels on high energy plastics and metal. Material tracking labels and automotive marking labels (IMDS data available up on request).

THERMLfilm® Advantage
SUPERB

Superb high performance modified acrylic adhesive with medium shear, peel and tack values. Excellent adhesion on medium surface energy plastics and automotive paint.

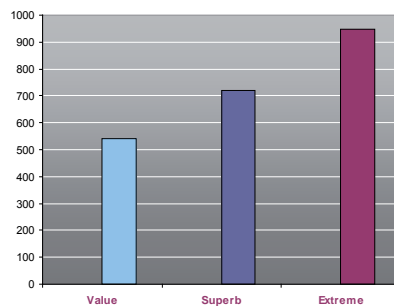

Typical use for industrial labels on rougher surfaces like computer housings. Material tracking labels on medium surface energy plastics like polycarbonate and ABS. Also suitable for automotive marking labels (IMDS data available up on request).

THERMLfilm® Advantage
EXTREME

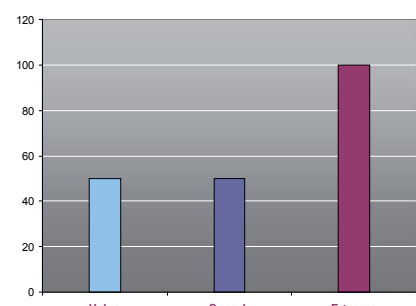

Extremely high performance modified acrylic adhesive with high shear, peel and tack values. Excellent adhesion on low surface energy plastics like PBT and PA66. Higher adhesive coat weight of 36µ for improved performance on rough surfaces.

Typical use for industrial labels on rough surfaces like cast aluminium. Material tracking labels on structured or low surface energy plastics and automotive marking labels (IMDS data available up on request).

FLEXcon's
long-standing formula
for success
—
putting the needs
of customers first.

From the President

FLEXcon is a technology-driven company that coats, laminates and embosses films.

Since our founding in 1956, we have focused on our customers' application challenges, consistently providing solutions to their demanding performance and aesthetic requirements.

We place a high value on trust, teamwork and long-term relationships with customers. The best way to achieve mutual success is for us to work together, combining our expertise and experience.

I am proud to introduce you to FLEXcon. I can confidently assure you we will strive to meet your pressure-sensitive film needs better than anyone else in the world.

Neil McDonough, President & CEO

At FLEXcon,
we focus on individual
customer business needs;
we combine our applica-
tions expertise with our
polymeric materials tech-
nology to provide our
customers with product
identification, promotion
and bonding solutions.
