

Proven Solar Module Backsheet Solutions For Today and Tomorrow.

Understanding Your Needs. Meeting Your Demands.

For more than 5 years, FLEXcon has been a reliable, global supplier of solar module backsheet solutions for the photovoltaic industry. As a result, we have developed an intimate understanding of what module and encapsulant producers are looking for in backsheet protective laminates – and are delivering what’s required:

- Proven TPE product constructions - Tedlar®* / PET / EVA. Customized solutions also available – PVDF, PET, Aluminum.
- A range of complimentary pressure-sensitive label stocks - embedded TTR-printable labels, power rating nameplates, branding labels, transfer tapes and double-coated products.
- Compliance with strict industry standards such as UL and IEC.
- Superior, consistent product quality and performance.
- Unmatched applications and technical support.
- Continuous R&D work on next-generation products for conventional, thin, and flexible modules.

FLEXcon, an ISO 9001:2000 manufacturer, has been laminating vinyls and polyesters, and coating heat seal adhesives and pressure-sensitive adhesives for over 50 years – longer than anyone else. So you can trust us to deliver exactly what you need, when you need it.

FLEXcon. A Reliable Global Resource.

Due to our long-standing relationship with DuPont, FLEXcon is a continuous, reliable resource for backsheet solutions constructed with Tedlar®, which has a proven record of success spanning over 25 years. With manufacturing capabilities in Europe and North America, FLEXcon offers an uninterrupted supply of backsheet protective laminates of all types. Our experts can work with you to find the best solution for your application.

Our sophisticated coating, laminating and finishing capabilities enable FLEXcon to meet your most demanding global supply requirements.

FLEXcon's product development optimizes existing products and designs custom solutions that meet world-class industry standards.
