Security Seals

FLEXcon® has it all

Lab Diagnostics Labels - Wristbands - Vial Labelling -
Skin Contact Adhesives - Medical Device Labelling

dermaFLEX™ Biocompatible Adhesives

A material intended to interface with the surface of your body must be biocompatible, or it just won't make the cut. FLEXcon offers a series of biocompatible, skin contact adhesives in our dermaFLEX™ product line. Each has met the three requirements for intact skin contact within the ISO 10993 standard (Sensitization, Irritation, Cytotoxicity).

APPLICATIONS TO CONSIDER:

- SKIN CONTACT - NOSE STRIPS
- ELECTRODES - MEDICAL TAPES

WRISTBANDS

FLEXcon® offers a wide range of soft, flexible, skin friendly films. Those can be used on their own or laminated together to give required thickness, rigidity or embossed appearances. In combination with different topcoats these films are direct thermal or thermal transfer printable. Tear resistant and tamper-evident features can also be supplied.

LAB DIAGNOSTIC - VIAL - and OTC LABELLING

FLEXcon offers a wide range of PHARMcal® products which withstand the rigors of autoclaving, sterilisation and pasteurisation. Labels need to adhere to tight radii of vials, ampoules and bottles without lifting. Available with or without UV tracers.

When it comes to chemical resistant labels FLEXcon's THERMLfilm CHEMGARD® is used when labels may come in contact with IPA, MEK, Xylene.

Think about FLEXcon's THERMLfilm® Advantage Range for durable OTC Labelling and to secure your products with our SECURITY Range.

APPLICATIONS TO CONSIDER:

- WRISTBANDS
- SECURITY SEALS
- HANGER LABELS
- GLUCOSE STRIPS

Pharmaceutical Packaging Requirements - New EU Directive (EU 2016/161)

Falsified (or counterfeit) medicines are a huge threat to consumer health and public safety. As a result, much work has been carried out to try and regulate this area. New EU legislation is now in place which sets out the details of obligatory "safety features" for medicines which will guarantee medicine authenticity and secure the medicine supply chain.

FLEXcon® has it all - Pharmaceutical Solutions to meet the EU regulations:

- LABELS: Polypropylene, Polyester
- COLOURS: White, Clear, Silver or custom
- PRINTABLE: Flexo, Screen, TTR or Digital
- LONGEVITY: from 2 to 15 years
- SECURITY FILMS: PP, PE, Acrylic, Acetate, Overt Solutions, VOIDING Films 2D - 3D Holograms
- NON VISIBLE: Covert solutions upon removal or with UV light
- FOOTPRINT Adhesive technology

CRYOGENIC LABELLING

FLEXcon specifically designed CryoFLEX® to function in temperatures from -80°C up to 80°C. Suitable for autoclave, ethylene oxide, gamma and electron beam. Application: Cryogenic Specimen Labels.

MEDICAL DEVICE LABELLING

Legislative changes in the way medical devices are labelled are in the final stages globally. Medical Device Manufacturers will be required to uniquely identify medical devices with products that pass UL/IEC 60601-1 3rd edition durability rub tests. Produce **U**nique **D**evice **I**dentifier Labels with:

FLEXcon's MedFLEX™ Range:

- Designed for UDI Labels
- Consistent surfaces smoothness
- Excellent dimensional stability
- Endurance to varying temperatures
- LAMINATES to resists extreme temperatures, abrasion and chemical exposure for maximum label protection
