

Benefits

Features

- 3.6 mil flexible clear polyolefin (non-vinyl "greener") phthalate-free film that produced with less solvent with a smooth surface for graphic reproduction
- Printable via UV and solvent screen, and UV inkjet reducing VOC emissions
- Phthalate free and produced with less solvent as compared to solvent adhesive systems
- Complies with CONEG and CPSIA
- Low tack, removable pressure-sensitive adhesive bonds well to smooth non-tinted glass interior and exterior surfaces over a wide range of temperatures while removing cleanly
- Adhesive adheres well to an exterior glass surface over a wide range of temperatures
- 90 lb. moisture stable polycoated layflat release liner ideal for sheet and roll-to-sheet converting
- Excellent layflat release liner properties for printing and converting

Additional Details

Definitions: CONEG = Northeastern Governors; CPSIA = Consumer Products Safety Improvement Act; and VOCs = Volatile Organic Compounds). Please refer to [Flexcon's Window Graphics Installation Guide](#) for more information.

For Inkjet Printing:

- Typical max. ink limit = 250%;
- When storing printed graphics, sheeted, stacked or in roll-form, consider leaving an unprinted margin (about 1/4") to allow for potential shrinkage of the film before trimming
