

Benefits

DermaFlex™ adhesives have been tested for biocompatibility (skin irritation, sensitization, and cytotoxicity) by Flexcon's adhesive suppliers using ISO-10993 or similar test methods*.

Features

- NNRU (Nylon Netting Reinforced Urethane) substrate consisting of a conformable polyurethane film reinforced with a nylon netting for high extensibility & strength
- .001” clear nylon reinforced polyurethane film
- High-performance adhesive with ultra-high strength for extended wear, such as attachment of long-term wearable devices
- Adhesive bonds to smooth and textured TPO's and other low-energy surfaces commonly found in medical devices
- Backed with a 50 lb. bleached kraft release liner ideal for roll-form converting

Additional Details

Please note: Our combination of flexible substrates and skin-friendly adhesives form a product portfolio that is suitable for a variety of applications. Choose from existing products, or work with our Technical Service team to create your own unique combination that's optimized for your specific application needs
*Biocompatibility testing was completed using a similar 'source' adhesive in some circumstances. Full biocompatibility results are available on the web and upon request.
